to solve performance problems in modern computing infrastructures often comprising thousands of servers running hundreds of applications spanning multiple tiers you need tools that go beyond mere reporting you need tools that enable performance analysis of application workflow across the entire enterprise that s what pdq pretty damn quick provides pdq is an open source performance analyzer based on the paradigm of queues queues are ubiquitous in every computing environment as buffers and since any application architecture can be represented as a circuit of queueing delays pdq is a natural fit for analyzing system performance building on the success of the first edition this considerably expanded second edition now comprises four parts part i contains the foundational concepts as well as a new first chapter that explains the central role of

queues in successful performance analysis part ii provides the basics of queueing theory in a highly intelligible style for the non mathematician little more than high school algebra being required part iii presents many practical examples of how pdq can be applied the pdq manual has been relegated to an appendix in part iv along with solutions to the exercises contained in each chapter throughout the perl code listings have been newly formatted to improve readability the pdq code and updates to the pdq manual are available from the author s web site at perfdynamics com

makes performance analysis and queueing theory concepts simple to understand and available to anyone with a background in high school algebra presents the practical application of these concepts in the context of modern distributed computer system designs packed with helpful examples that are based on the author s experience analyzing the performance of large scale systems over the past 20 years

analyzing computer systems performance is a tedious and recurring task of system administrators programmers and project managers this work makes this difficult subject understandable executable and manageable

this book constitutes the refereed proceedings of the 18th conference on computer networks cn 2011 held in ustron poland in june 2011 the 50 revised full papers presented were carefully reviewed and selected for inclusion in the book the papers can be divided into the following subject groups molecular networks network issues related to nano and quantum technology new technologies related to the computer networks fundamentals of computer networks architecture and programming internet networks data security in distributed systems industrial computer networks applications of computer networks

these proceedings present technical papers selected from the 2012 international conference on intelligent systems and knowledge engineering iske 2012 held on december 15 17 in beijing the aim of this conference is to bring together experts from different fields of expertise to discuss the state of the art in intelligent systems and knowledge engineering and to present new findings and perspectives on future developments the proceedings introduce current scientific and technical advances in the fields of artificial intelligence machine learning pattern recognition data mining knowledge engineering information retrieval information theory knowledge based systems knowledge representation and reasoning multi agent systems and natural language processing etc furthermore they include papers on new intelligent computing paradigms which combine new computing methodologies e g cloud computing service computing and pervasive computing with traditional intelligent methods by presenting new methodologies and practices the proceedings will benefit both researchers and practitioners who want to utilize intelligent methods in their specific fields dr fuchun sun is a professor at the department of computer science technology tsinghua university china dr tianrui li is a professor at the school of information science technology southwest jiaotong university chengdu china dr hongbo li also works at the department of computer science technology tsinghua university china
